November 30, 2020

INCIDENT FACTS AND SUMMARY – Alpine County			
Total confirmed cases	Total new confirmed cases in Oct/Nov	East Slope – new cases in Oct/Nov	West Slope – new cases in Oct/Nov
51	48	48	0
Total positive tests Last 7 days	Total positive tests Last 14 days	Test positivity latest assessment	Tests per 100,000 population
1	14	5.8%	665.0
Active cases (currently in isolation)	Released from isolation to date	Residents currently hospitalized	Total COVID-19 deaths
4	47	2	0

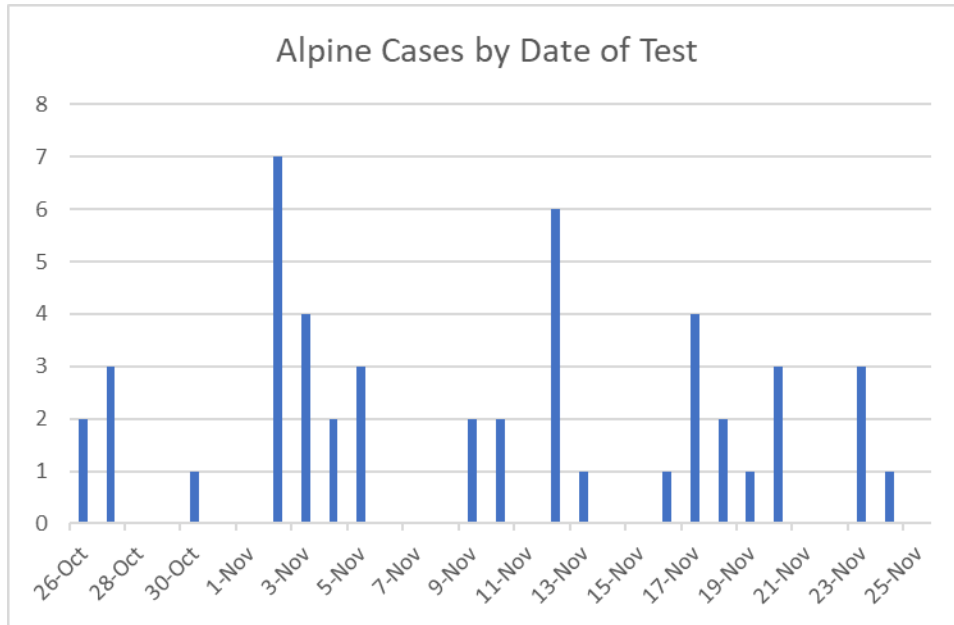

CURRENT SITUATION

- Over the past 14 days, COVID hospitalizations have increased by 89%, and COVID ICU admissions went up 67%. Yesterday, California broke a record with a total of 7,400 hospitalizations, which has increased to another record of 7,787 persons today.
- It is projected that most areas of California will run out of ICU beds in the next 2-4 weeks. We anticipate more restrictive measures may be ordered by the Governor this week in light of the worsening situation throughout the state regarding hospital bed availability, especially the shortage of ICU beds.
- Hospitals in Douglas County, Carson City, and Reno are similarly stressed with dramatic surges.
- Alpine County has been assigned to the RED TIER. For more details see: [Blueprint for a Safer Economy - Coronavirus COVID-19 Response \(ca.gov\)](#)
- The following pages contain data as updated today for Alpine County and the state of CA.

Region 4 hospital data (Alpine County is in Region 4):

<https://public.tableau.com/profile/ca.open.data#!/vizhome/shared/5NZPYTJCN>

State health officials are projected that current coronavirus case rates will fill ICU beds in most parts of California in December.

Region	Current ICU beds occupied	Projected ICU beds occupied on 12/24	Date meeting ICU capacity
California	75%	112%	Mid December
Bay Area	72%	91%	Early January
Greater Sacramento	76%	103%	Late December
Northern California	85%	134%	Early December
San Joaquin Valley	78%	120%	Mid December
Southern California	74%	107%	Mid-Late December
