24/7/365 Emergency Contact Number  
Dispatch: 530-694-2231, Ext 330  
Warm Line: 530-694-1011

Wednesday January 27, 2021

### Alpine County Update - COVID-19 Vaccine

- All vaccine appointments for today in **Woodfords** have been **cancelled** due to concern for the safety of staff and public in the current winter storm. All have been rescheduled for next Wednesday Feb 3<sup>rd</sup>.
- Weather permitting, vaccinations will be administered in **Bear Valley** tomorrow Jan 28<sup>th</sup>. If cancellation needs to occur, persons with appointments will be notified and rescheduled.

### Who is **eligible** for COVID-19 vaccine in Alpine County?

- All persons at least 65 years of age who **live in** Alpine County
- Persons who **work in** Alpine County in the following 3 sectors:
  - Education, including early childhood education and child care
  - Emergency services (law enforcement, fire services)
  - Food and agriculture, including food services (restaurants and bars)
  - Other frontline essential workers as determined by interview

### Where can I get vaccinations?

- Woodfords at the Alpine County Health Department Clinic
- Bear Valley, in the Perry Walther Building
- Washoe Tribal Health Center in Dresslerville

### How do I make an appointment?

- Woodfords and Bear Valley – call the Warm Line at 530-694-1011
- Washoe Tribal Health Center – call 775-265-8622

# Background

The rollout of vaccinations has been clumsy, hampered by inadequate supply to meet the need, and lack of information about anticipated supply which prevents effective planning. Recent developments have occurred at both the federal and state levels to address these issues:

- [Biden administration aims to have enough vaccine for most Americans by summertime | Reuters](#)
- [COVID Vaccine: California Assumes Greater Control Of Vaccine Distribution – CBS San Francisco \(cbslocal.com\)](#)

It is not clear to Alpine County what this will mean for our vaccine supply, but we are hopeful for both increased supply and advanced notice of 3 weeks as to anticipated allocations.

Our goals:

- To vaccinate those at highest risk of poor outcomes from infection (seniors) and those at highest risk of exposure (essential workers)
- To ensure the completion of the series of 2 vaccinations within 28-42 days with full doses.
- To balance the supply and demand efficiently. We do not want to make appointments or promises we cannot keep, but we recognize that vaccine in our freezer does no one any good. The vaccine must be in people's arms to reduce community risk of illness and death!

What is happening with the current surge?

- The Governor has released all regions and counties from the Regional Stay-at-Home Orders: [Governor Newsom California COVID-19 Update: January 25, 2020 - YouTube](#) (Starts 8 minutes into the link)
- Alpine County is currently in the Red Tier: [Blueprint for a Safer Economy - Coronavirus COVID-19 Response \(ca.gov\)](#) We are currently meeting criteria for eventually moving to a less restrictive tier. [COVID-19 | Alpine County, CA - Official Website](#)

What are the current threats:

- Mutant variant strains: [New COVID-19 Variants | CDC](#) So far, evidence says that the Moderna vaccine is still effective against the new strains that have been appearing.
- Complacency: This is far from over, and the worst may be yet to come if new strains appear or the vaccine is not effective against any of them. [Why the Covid Vaccine Rollout Is Not Enough to Curb Infections - The New York Times \(nytimes.com\)](#)
- We believe that people who have been vaccinated are protected from disease, but do not know if they could potentially carry the virus in their nose and spread it to others. We all must continue to wear our mask and practice social distancing! [Frequently Asked Questions about COVID-19 Vaccination | CDC](#)
